DETAILED ACTION

This is written in reference to application number 09/676487 filed on October 2, 2000.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2 and 9-12, drawn to a photopolymerizable composition of given formula (1) and recording material thereof, classified in class 430, subclass 270.1.
 - II. Claims 3-4 and 13-16, drawn to a photopolymerizable composition of given formula (2) and recording material thereof, classified in class 430, subclass 270.1.
 - III. Claims 5-6 and 17-20, drawn to a photopolymerizable composition of given formula (3) and recording material thereof, classified in class 430, subclass 270.1.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II; I and III; and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are photopolymerizable compositions comprising three different compounds represented by formulae 1, 2 and 3, respectively.

Art Unit: 1752

4. Because these inventions are distinct for the reasons given above and the search required for each of groups I, II and III are different, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention: an polymerizable ethylenically unsaturated compound wherein (1) the compound has a site which reacts with the color forming component and causes the color-forming component to develop a color (cl. 9, 13 and 17); and (2) the compound has a site which inhibits the reaction between the color-forming component and the color forming compound (cl. 11, 15 and 19).

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-2 of group I; claims 3-4 of group II; and claims 5-8 of group III are generic.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. A telephone call was made to Darryl Mexic on January 15, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yvette M Clarke whose telephone number is 703-305-0589. The examiner can normally be reached on Monday-Thursday 7-5:30.

Art Unit: 1752

14. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Baxter can be reached on 703-308-2303. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

15. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1193.
